

Day 15
April 8

Black Holes

Too Give Birth

To Stars...

BE DIVINE...SEE AND SERVE DIVINITY

INVOKE, EVOKE, INVOLVE, EVOLVE

FROM EXTERNAL TEMPORARY TO INTERNAL INFINITY

- Often, what retards our spiritual progress are emotions that have been neglected and stacked away. Childhood pains, fears and traumas hidden and buried deep in the psyche lead to emotional inhibitions...they need to be accepted, brought to the fore, resolved and their impact released into the Divine Light and Love of our Precious Lord.

Saishwara Arpanam Astu!

- Every occurrence in life is a learning lesson, till the lessons are learnt the experiences keep recurring.
- When overwhelmed or cornered by innumerable situations, that seem as dark-as-a-huge stormy-night, remember that in a certain galaxy, a monster black hole is giving birth to new stars! NASA's Hubble Telescope finding in early 2022, suggests that black holes can be more productive than imagined, being able to create stars and not just 'eat' them.
- If only we pause in the midst of darkness, we will know that the Light of God is always upon us guiding, protecting, showing the way ahead. Then, every occurrence becomes a productive lesson.
- **We may visualise Beloved Bhagawan right before us, glowing, resplendently, His Aura ever so immense and wondrous.**
- **Gradually, the Form merges into a Bright, Brilliant Effulgence, spreading far and wide, encircling and embracing the environment and all that lives in it, filling us with awesome joy, beyond words.**

- Consequently, with awe and humility, we may place the bundle of our negative emotions, impacts, fears, nasty experiences or unpalatable traumas into this Light and watch it disappear completely, intuitively aware that within that Sacred Space it is converted into the Indescribable Energy of Divine Love.
- **And then, in sheer amazement, let us experience these rays of Pure, Pristine, Incomparable Love coming our way, drenching us, empowering us, energising us with inexplicable love.**
- Vividly experience the colours, beautiful shades and tones, blending into each other, a texture so divine...dancing pink hues, bathing our entire being, reviving a trail of harmony. We may then relax and be one with this Celestial Radiance...feel at peace and totally healed. The joy of our innermost self is revitalized.
- **Today, shall we involve ourselves in this creative visualisation and soar high with Beloved Sai?**
- Why carry the weight when Bhagawan is simply waiting to reduce and remove it?
- Release the fist, unclench, let go of ego and let Sai takeover from within. Saieshwara Arpanam Astu!

**Share A Shower Of Prema And Blossom Forever
As Bhagawan's Premaswarupulara!**
